B R A N D M A R K S

PRIMARY LOGO

PRIMARY LOGO  
(over picture)

To be used against black, picture, or color.

FALLBACK LOGO

To be used in exceptional cases against white.

LOGO AGAINST GRADIENT

White logo can be added to any part of this gradient background for circle formats (primarily social media icon use).

Gradient logo should NOT be used on campaign creative assets.

Three additional social media icons are available, but they must be cropped to fit a circle.

T Y P O G R A P H Y

In principle, the typeface BMW Type Next Light is used.

HEADLINES AND SUBHEADLINES  
ARE SET IN UPPER CASE,  
while body copy is set in upper case and lower case.

The other typefaces can be used to ensure optimal legibility and text structure, for example in body copy, intermediate headlines or price labelling.

In digital media, clickable elements are always set in Bold. Offer copy is written in "Sentence" case.

COMPROMISE? WE DON'T EITHER.

Dear %First Name%,

What happens when you put the most powerful BMW production engine ever developed inside our spacious Sports Activity Vehicle® and Sports Activity Coupe®? Two high-performance vehicles that refuse to compromise on anything.

The X5 M and the X6 M may have big, powerful frames, but with a specifically tuned M suspension, they're just as agile as some of the fastest sports cars on the road. So if you're thinking of compromising on your next car, don't. Size, power and agility—you get everything.

Contact a Client Advisor at %DEALER NAME% to take a test-drive today.

W E B

A C C E S S I B I L I T Y

Designing for WCAG Level AA Compliance

All web assets for BMW must comply with WCAG Level AA Compliance requirements.

### **1.1.1 Non-text Content            Level A**

All non-text content that is presented to the user has a text alternative that serves the equivalent purpose.

### **1.2.5 Audio Description            Level AA**

Audio description is provided for all prerecorded video content in synchronized media.

### **1.4.3 Contrast (Minimum)            Level AA**

The visual presentation of text and images of text has a contrast ratio of at least 4.5:1, except for the following:

Large Text: Large-scale text and images of large-scale text have a contrast ratio of at least 3:1;

Incidental: Text or images of text that are part of an inactive user interface component, that are pure decoration, that are not visible to anyone, or that are part of a picture that contains significant other visual content, have no contrast requirement.

Logotypes: Text that is part of a logo or brand name has no contrast requirement.

### **2.4.6 Headings and Labels            Level AA**

Headings and labels describe topic or purpose.

**Step 1: Open your choice of contrast ratio calculator:**

Easy Contrast Ratio Check (Only tests for AA):

[contrast-ratio.com](https://contrast-ratio.com)

Advanced Contrast Ratio Check (Tests for AA and AAA):

[webaim.org/resources/contrastchecker](https://webaim.org/resources/contrastchecker)

**Step 2: Acquire the hex code of a foreground element to check**

For example: "MAKE EVERY DAY" is set in #FFFFFF (white)

**Step 3: Acquire the hex code of lightest shade**

in the immediate background

For example: the sky is approximately #696968

**Step 4: Enter the hex codes into a calculator**

and edit your artwork or design until  
the ratio passes the required minimum.

**Easy Contrast Ratio Check (Only tests for AA):**

[contrast-ratio.com](https://contrast-ratio.com)

**Advanced Contrast Ratio Check (Tests for AA and AAA):**

[webaim.org/resources/contrastchecker](https://webaim.org/resources/contrastchecker)

**Contrast Ratios Minimums**

WCAG Level AA: Greater than or equal to 4.5 : 1

WCAG Level AAAA: Greater than or equal to 7 : 1

**Summary:**

**1.1.1 Non-text Content Level A**

All non-text content that is presented to the user has a text alternative in HTML that serves the equivalent purpose, like a hover-activated tool tip that displays alternative text.

**1.2.5 Audio Description Level AA**

Audio description is provided for all prerecorded video content in synchronized media.

**1.4.3 Contrast (Minimum) Level AA**

Using [contrast-ratio.com](https://contrast-ratio.com) or [webaim.org/resources/contrastchecker](https://webaim.org/resources/contrastchecker), compare the hex codes for the foreground color and background color to ensure that the ratio between those colors is greater than 4.5 to 1.

**2.4.6 Headings and Labels Level AA**

Have a clear, intentional headline with an established hierarchy of information.
