In Grato Dedicamus

If meaningful relationships are built upon a foundation of one another's needs, then the relationship between Dr. Hyman Kamens and the Class of 1964 is a solid and a lasting one. For our class hungered for *enjoyment* in optometry, a facet of optometry that can be easily forgotten during four years of academic pressure and the seemingly eternal prospect of taking one examination after another. We craved an optometric release—and found it in this man. *Our* need was filled by means of both his marvelous and quick sense of humor—a warm and sincere humor—and also his radiating, contagious love for the practice of optometry. And *his* need? . . . perhaps this was filled by the continual presence of our class members in his office and his knowledge of the sense of pleasure we had in simply being close to him.

Dr. Kamens is a rare man and a rarer teacher. He has torn down the invisible wall between teacher and student—a wall, which for the ordinary man, must exist to maintain his sense of dignity. Yet the Class of 1964 possesses overwhelming respect for this individual. How? Perhaps we see in him an image of our own drives for professional superiority—a real, magnified, and erect image, because of his deep genuineness, warmth of person, and deep humility.

Hyman Richard Kamens is more than a teacher; he is a friend, and because of him, the Class of 1964 has discovered the joy of optometry.

TO THE GRADUATES OF THE CLASS OF 1964

The 1963-64 academic year is fast coming to a close. And, as it has been my privilege in the past, I am taking this opportunity afforded me by the editors of the Reflections, to wish each student in the Class of 1964 my heartiest best wishes for the successful practice of optometry.

From long experience we have learned that our responsibilities to our students continue long after their graduation from the College. Therefore, I want to assure each of you that the administrative staff and members of the faculty stand ready to give what assistance we can when needed.

Congratulations and best wishes.

Sincerely,

Ralph H. Gress

Dave Housman

Early in our optometric education the class of 1964 set a monumental aim—to take advantage of superior academic opportunities. During the past four years, this goal has been maintained.

Each individual's sense of responsibility, his initiative, and his hard work coupled with the ability to work together as a group has made possible this accomplishment. There were days of anxiety, frustration, and diffidence; but these were short lived.

Our past four years at M.C.O. have been probably the most pleasant, interesting, and academically rewarding years of our lives. Each class member can hold his head high and be proud to have been a part of a very special group—the class of 1964 of the Massachusetts College of Optometry.

Carl

JOEL D. ALTMAN
Temple University A.B.

"Music is a discipline, and a mistress of order and good manners, she makes the people milder and gentler, more moral and more reasonable."

MARVIN G. BAUM
Cambridge Junior College

"The excellence of equanimity is beyond all praise. One of this disposition is not dejected in adversity, nor elated in prosperity; he is affable to others, and contented in himself."

RICHARD M. BELLO
Providence College B.A.

"Energy will do anything that can be done in the world; and no talents, no circumstances, no opportunities will make a two-legged animal a man without it."

JAMES A. BROCKWAY
Albany State Teachers College

"He is most free from danger, who even when safe, is on his guard."

PAUL R. EDELMAN
New York University

"In life, as in whist, hope nothing from the way cards may be dealt to you. Play the cards, whatever they be, to the best of your skill."

RONALD R. FIELDS
Long Island University
Brooklyn College

"If you would be pungent, be brief; for it is with words as with sunbeams—the more they are condensed, the deeper they burn."

BERTRAM L. GEISINGER
Columbia University

"Confidence imparts a wondrous inspiration to its possessor. It bears him on in security, either to meet no danger, or to find matter of glorious trial."

E. ROBERT GROSSMAN
Tufts University B.A.

"There is no road too long to the man who advances deliberately and without undue haste; no honors too distant to the man who prepares himself for them with patience."

So you want to

CARL A. GUSTAFSON
Boston University B.S.

"There is one art of which every man should be a master—the art of reflection. If you are not a thinking man, to what purpose are you a man at all?"

JAMES C. HERRING JR.
Wake Forest College

"If a man can write a better book, preach a better sermon, or make a better mouse-trap than his neighbor, though he built his house in the woods, the world will make a beaten path to his door."

DAVID S. HOUSMAN
University of Buffalo B.A.

"There never was any heart truly great and generous, that was not also tender and compassionate."

KENNETH A. KAPLAN
University of Rhode Island

"An inexhaustible good nature is one of the most precious gifts of heaven spreading itself like oil over the troubled sea of thought, and keeping the mind smooth and equable in the roughest weather."

the spring*

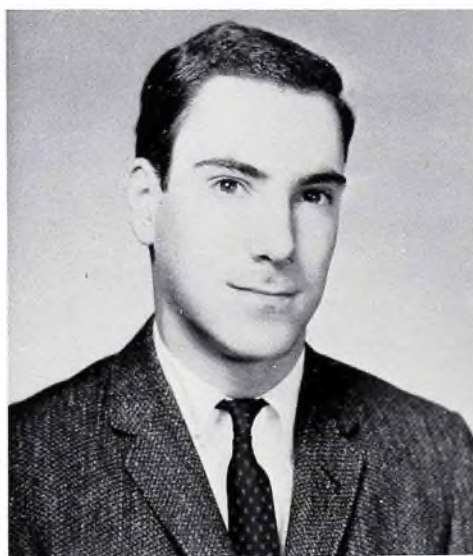

EDWARD P. KENNEY
Merrimack College B.A.

"Wit is not leveled so much at the muscles as at the heart; and the latter will sometimes smile when there is not a single wrinkle on the cheek."

FRANKLIN L. LEVIN
College of William & Mary

"Justice and power must be brought together, so that whatever is just may be powerful, and whatever is powerful may be just."

LYNN B. LUTZ
Worcester Junior College

"Fellows who have no tongues are often all eyes and ears."

JAMES A. MICHAUD
Aroostook State Teachers College
University of Maine

"There is nothing more to be esteemed than a manly firmness and decision of character. I like a person who knows his own mind and sticks to it; who sees at once what, in given circumstances, is to be done, and does it."

FRANKLIN S. MICHELSON
City College
Queens College

"The first impulse of conscience is apt to be right; the first impulse of appetite or passion is generally wrong. We should be faithful to the former, but suspicious of the latter."

RONALD E. NEWTH
Western Reserve University
University of Arizona

"You are to come to your study as to the table, with a sharp appetite whereby that which you read may the better digest. He that has no stomach to his book will very hardly thrive upon it."

JOSEPH W. PATNIK
University of Miami B.S.

"Those who differ most from the opinion of their fellow-men are the most confident of the truth of their own."

CALVIN S. PISETSKY
University of Connecticut

"He is the eloquent man who can treat subjects of a humble nature with delicacy, lofty things impressively, and moderate things temperately."

BARRY S. PIVNICK
University of Connecticut

"The greater the difficulty, the more glory in surmounting it. Skillful pilots gain their reputation from storms and tempests."

FREDERIC ROSE
Tufts University B.S.

"Kindness in ourselves is the honey that blunts the sting of unkindness in another."

Would you also

MICHEL C. SCHEURER
Assumption College B.A.
Worcester State Teachers College M.Ed.

"There is a pleasure in the pathless woods; there is a rapture on the lonely shore; there is society, where none intrudes, by the deep sea, and music in its roar."

THOMAS M. SHEEHAN

Providence College

"Make no display of your talents or attainments; for every one will clearly see, admire and acknowledge them, so long as you cover them with the beautiful veil of modesty."

DAVID S. SMITH

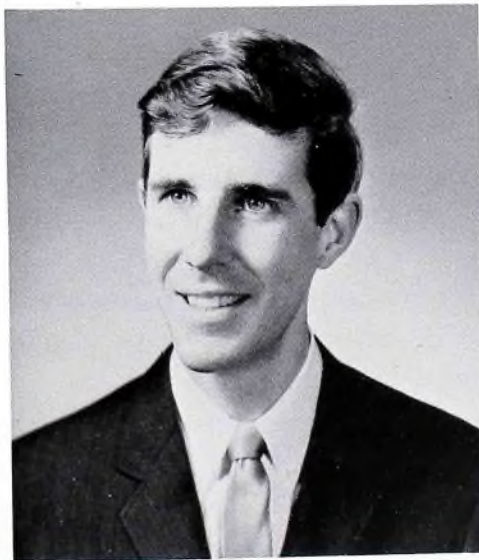

Hobart College

"The crown of all faculties is common sense. It is not enough to do the right thing, it must be done at the right time and place. Talent knows what to do; tact knows when and how to do it."

C. DAVID THOMPSON

Suffolk University

"Amiable people, though often subject to imposition in their contact with the world, yet radiate so much of sunshine that they are reflected in all appreciative hearts."

DAVID H. UPTON

University of Maine

"Sincerity is like traveling on a plain, beaten road, which commonly brings a man sooner to his journey's end than by-ways, in which men often lose themselves."

As we complete another year of our professional education, we have realized many things that are not items of instruction in the formal curriculum. We find ourselves about to take the final step toward our goal, becoming optometrists. As is always the case, the more we learn, the more we become aware of the myriad of things that we must still come to appreciate prior to being ready to practice modern optometry.

Our immediate challenge now is that in one short year we must learn clinically applied optometry; we all face the responsibility to a patient for the first time next year. We feel prepared academically and it is our pledge that we will, to the last man, be successful.

The class of '65 would like to extend congratulations to the class of '64 and stands ready to fill the role of *seniors* left vacant by their graduation.

Council

The student council has just completed another year of activities dedicated to serving the interests of the student body. Some of the activities falling under the sponsorship of the council are:

The Eyeball—this year's gala affair held at the Bradford Roof

The Yearbook—publication of the senior class marking their graduation

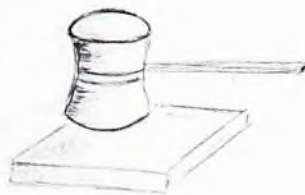

Camera Club—a group of "shutterbugs" taking and developing pictures of many student activities

Forum—presents optometric lectures to the students

Mimeographing—the council underwrites all costs of maintaining a mimeo room for student use

Fraternities—both frats are furnished financial support in some of their social undertakings

The student council can only be as strong as its constituents and hopes that next year, with increased student support, it will do more for the students.

A new version of the EyeBall, held Saturday evening, April 11, at the Hotel Bradford, was enjoyed by students, faculty, administrators, and invited guests.

Following the invocation by the Reverend Rhys Williams of Boston's Unitarian Church and the introduction of the head table which included Dr. and Mrs. Ralph Green, and President G. Edward Bradley, Master of Ceremonies Glen Gulezian awarded to Dr. Foster Namias an engrossed parchment citation honoring his thirty-two years of service to the students, to the College, and to the profession.

Midway through this gala dinner dance, Mrs. Rochelle Weissberg, wife of Paul Weissberg, was selected as the beauty queen.

Grand prize of an ophthalmoscope, donated by the American Optical Company, was won by Louis Herrero and the secondary prize of a lens clock, given by Bausch and Lomb, was taken by Joseph Patnik.

It was indeed a festive evening!

Chairman Glen Gulezian

Advisor Dr. Carroll Martus

The third consecutive year of the Optometric Forum came to a close with the presentation of "Purchasing a Practice" by Dr. Richard Ferris of Providence, R.I.

A Forum highlight of the past year was the appearance of Dr. G. N. Getman of Luverne, Minn., nationally known lecturer and author in the field of developmental vision.

A program on practice management called "Costly Mistakes" was given earlier in the year by two Mass. practitioners, Drs. Alwin Merrill and Melvin Fine. New York optometrist Murray Pachman presented an interesting program, "Industrial Vision."

The Forum honored one of its outstanding senior members and co-founder, Calvin Pisetsky, at graduation with the first Forum award.

Omega Epsilon

Zeta Chapter

O. E. Phi has just completed one of its most successful years. Obtaining 35 applications for membership is an outstanding achievement for which each brother may be proud.

As President, I feel this could not have been done without the close co-operation and hard work of our officers whom I would like to thank.

Banquet

Christmas
Party

Pi Omicron Sigma is the oldest professional optometric fraternity, founded in 1912 by such men as Dr. Benjamin Rosencranz, secretary of the N.Y. State board of examiners, and Dr. Vincent Reardon, head of the instrument division of the American Optical Co. Since that time P.O.S. has been in continuous existence except during World War II when every last man joined the service—an enviable record in itself.

P.O.S., as the initials indicate, is dedicated to Progress in Optometric Science, and we as students are doing all that we can to raise the level of the profession. For this purpose the fraternity became one of the first members of the American Optometric Foundation and has contributed over five hundred dollars to further research in Optometric Fields.

Our social calendar consists of many events, including the Freshman Smoker in the Fall, the Poverty Party in the Winter, and the annual Spring Banquet, all carefully planned by our social committee.

The purpose of the Dames Club is to provide to the student wives not only social activities but educational service as well. This year has been fairly active in both areas, considering our group is such a small one.

Among the educational programs were two interesting films by New England Bell Tel. & Tel. Co. called "Short Visual Memory" and "Telstar." Barstow papers were distributed at each meeting; however, the highlight of the year was an instruction on screening procedures by Dr. Phillip Friedman at the Clinic.

Some of the social activities included a welcoming tea, a demonstration of wigs and hairstyles, Alumni Homecoming at which the Dames were hostesses, and a tea at the Statler Hilton Hotel given by the Woman's Auxiliary to the New England Council of Optometrists.

Camera Club

The club had another successful year covering the major events on campus and off. From the Eyeball to the A.O.A. visit, our cameras were flashing!

Of course our big project of the year was coverage of homecoming as well as aiding in preparation of several of the exhibits.

Much thanks goes to President Remeny for the many hours he slaved in the darkroom as well as the time he spent clicking the shutter!

Contact Lenses

The Plastic Contact Lens Company offers a broad spectrum of contact lenses, all backed by the corporate policy of service with integrity, and each manufactured with exacting care to the required prescription to meet the unsurpassed standard of W/J quality.

The two basic lens types in the product line are the SPHERCON* lens, a contact lens with spherical base and power (front) curves, and the CYCON* lens. The name Sphercon not only refers to a lens of either the tri-curve or pentacurve configuration, but also to a method of fitting, intended to achieve as nearly as possible a uniform tear layer under the optic zone when in the centered position with peripheral opening for tear exchange.

The Cycon lens is one with a toroidal base curve and spherical power curve, designed to achieve an optimum physical fit for corneas which are not basically spherical in shape. A double Cycon lens is also available—this is a lens with a cylindrical central zone and a different cylindrical peripheral zone.

If residual astigmatism is encountered in the fitting of either the Sphercon or Cycon lens, a cylinder can be ground on the power (front) curve. This is the TORCON* lens.

for Every Need

The two basic lens types (Sphercon and Cycon) are available in lenticular form and, also Sphertan form—a lenticular type in which the transitional area between the front optical zone and the flange is a smooth curve. They are also available in bifocal form: the BICON*, de Carle, Black, and W/J fused bifocal types of contact lenses.

All lens types are available in various prism ballast forms and in sixteen colors (the SPHERTINT* lens); all can be fenestrated or truncated to stop rotation and all can be obtained with LUMICON* markings for identification and axis or other benchmark location. In addition, all lenses can be obtained in either regular or special W/J plastic.

The company product line also includes: W/J tri-curve cone lenses, Universal cone lenses, and the C. Arias rings for keratoconus correction; molded cone, molded scleral, and preformed scleral lenses; corneal cosmetic and scleral cosmetic contact lenses with either a clear or opaque pupil; the TELECON* telescopic lens for patients with sub-normal vision; and diagnostic lenses and gonioscopic lenses to view the interior of the eye with the slit lamp. In fact, contact lenses of every size and shape are made to your specifications.

*Registered Trademarks

If there are any questions, or if you require consultation or service of any kind in our field, please ask us or any of the Wesley-Jessen offices, a list of which is shown on the adjoining page. In addition to lenses W/J supplies a full line of up-to-date instruments and supplies. Please ask for and consult our latest catalog.

"Frames sure have come a long way since 1925"

Land's sakes, Granny's gone and done it! After all these years, it took Marine's new Luxurina to part her from her beloved "OO eye". Granny shouldn't have waited so long. Granted Luxurina's pretty special, we've had lots of other exciting fashion developments in the 39 years Marine's been serving the optical profession. We're proud of the many style firsts that have lifted Marine to the pinnacle of optical fashion. Proud of our constant advances in technology. Eager to continue being your partner in progress toward better vision for America. P.S. We tried to get a picture of Grandpa, too; but he was at the Grange meeting showing off his new Tech 32-50.

"YOUR FRIENDLY SUPPLY HOUSE"
20 Years Young

The Massachusetts Society of Optometrists' **Major Medical Expense Plan**

*Provides a \$10,000 CUSHION between you
and unpredictable risks.*

WHAT IS MAJOR MEDICAL?

Major Medical Expense Insurance is a relatively NEW and MODERN concept of Medical Care Protection, providing a "Broad-form, High-limit" bank account for you and each member of your family, thereby assuring **complete** and **adequate** medical care both IN and OUT of the hospital. It is designed to protect you against disastrous financial burdens that accompany serious Accidents or Sicknesses and provides benefits far beyond those usually available under Hospitalization plans.

This Major Medical Expense Plan supplements the existing Disability Income plan which has been in effect for many years. Call or write the Administrators for full details . . .

HOW DOES IT WORK?

If a Covered Person shall incur, within any period of ninety days, Medical Expenses in excess of the "Deductible," the Company will pay the Insured an amount equal to 80% of such expenses incurred within two years, provided the total amount for any one continuous period treatment shall not exceed \$10,000.

The "Deductible" enables this plan to be used in conjunction with ANY basic hospitalization plan to provide complete protection against the cost of medical care which we are often unable to predict or budget.

A host of talents, tasks, and technical considerations combine in professional practice. The vision specialist must deal daily with the public and still remain a scientist. He must handle his patients carefully, motivate the people with whom he works, and run his office with maximum efficiency. Basically there are two things upon which every successful practice depends: 1) the competence of the practitioner, and 2) the capabilities of his equipment. What is required of the man, is required of his tools also.

BAUSCH & LOMB

makers of incomparable Power-Poise Ophthalmic Units, Orthogon Lenses and fashion-right frames

AOLITE Aspheric Cataract Lenses

give your aphakic patients a dramatically improved field of view, greater comfort

AO's exclusive AOLITE Aspheric Cataract Lenses are designed with a continually changing radius of curvature; as a result, they are virtually free of marginal aberration. They provide aphakic patients with a wider, flatter, sharper field of view than ever before possible.

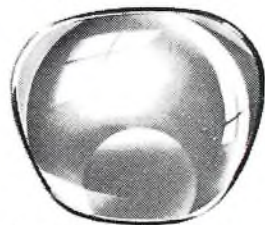

AOLITE Aspheric Lenses are twice as light as glass . . . unquestionably more comfortable than conventional glass cataract lenses . . . and can be edged to fit modern, fashionable frames. What's

more, they are priced within the means of most patients.

Available in white or Uniform Density Green (for indoor-outdoor protection), in both single vision and bifocal lenses—through your local AO Branch or Franchised Distributor.

HAPPINESS IS BETTER VISION!

**HAPPINESS IS ALSO GRADUATION!
GOOD LUCK AND BEST WISHES
TO THE CLASS OF 1964.**

LIBERTY *Optical* **NEWARK, N. J.**

POST-GRADUATE INVITATION!

One of my greatest pleasures each year is to welcome dynamic young blood to the profession. You graduates of the Class of 1964 have my heartiest congratulations and best wishes.

But may I point out that your education is just beginning . . . and may I suggest that a visit to one of America's great and creative frame manufactories could profitably be among your earliest post-graduate educational activities. I would be delighted to welcome you personally for a visit through the Victory plant and workrooms . . . at your very earliest opportunity.

Sincerely,

Vincent J. Salierno

congratulations...

We take pleasure in extending our sincerest congratulations to this year's graduating class. As Doctors of Optometry, your responsibilities will be many and varied when you engage in one of the most time-honored of the ethical professions. ■ It is and will continue to be our dedicated task to furnish you with the finest ophthalmic products and tools that modern science and creative thinking can produce. You may be assured that is a responsibility to which we will bend our most assiduous efforts.

Images of

Committee

The first homecoming, under the direction of Dr. Lamont, was a social smash on the last day of February. The alumni and students did a magnificent job planning the affair which included exhibits, refreshments and a limousine trip to the clinic . . . plus renewal of old friendships.
