

Camera is already used by another tab or application
(Make sure there is no any safari tab or application using camera)
Follow the steps to get solution

The screenshot shows the mobile app interface for 'Inspekt labs'. At the top, the status bar displays the time '9:01', LTE signal strength, and battery level. The app header includes the 'Inspekt labs' logo and a 'Connection' indicator. Below the header is a blue icon of a car with a camera. The main content area contains the text: 'Before you begin, please ensure the following.' followed by a numbered list of four requirements:

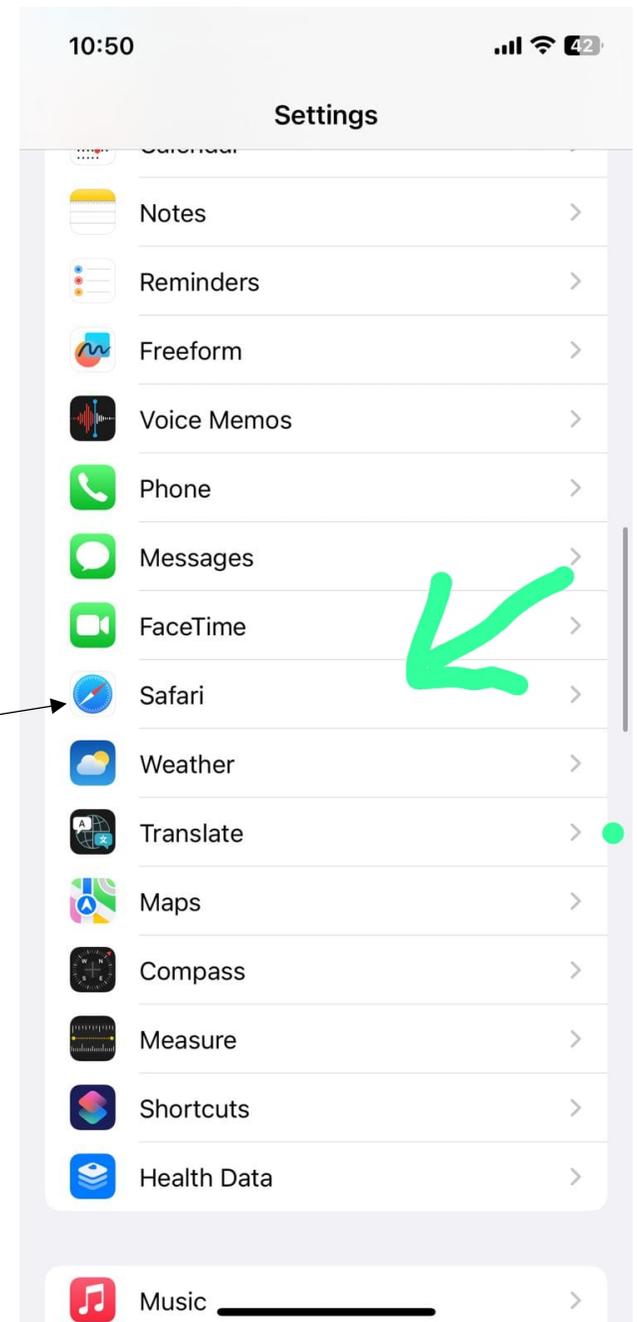

- 1 There should be enough space (at least 5 ft / 150 cm) around the car to capture the 360 degree video.
- 2 There is enough light in the area for a clear video.
- 3 Your car is clean and dust free.
- 4 Your device is connected to stable internet and camera is clean.

Below the list, a red error message states: 'Camera is already in use by another application or tab.' A blue 'Proceed' button is positioned below the error message. At the bottom of the screen, a browser address bar shows the URL 'erapp-uat.inspektlabs.com' and standard mobile browser navigation icons.

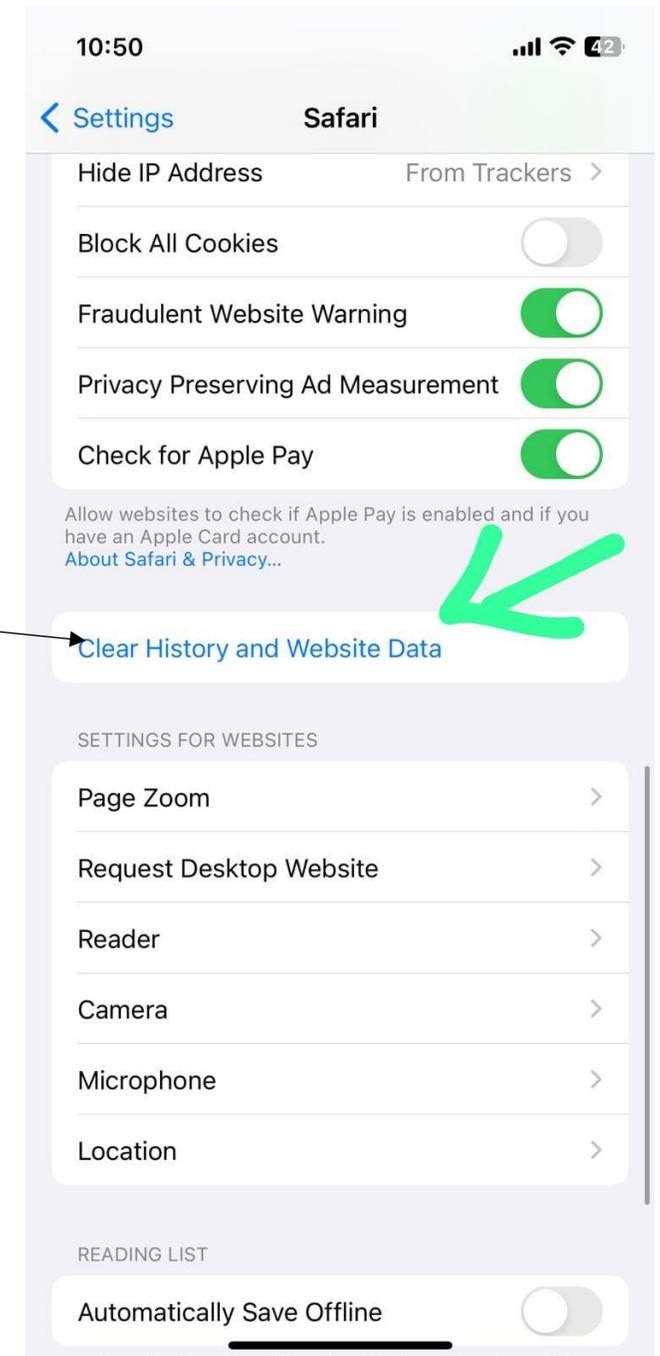

Step 1 -> Go to "*Settings*" of your iphone

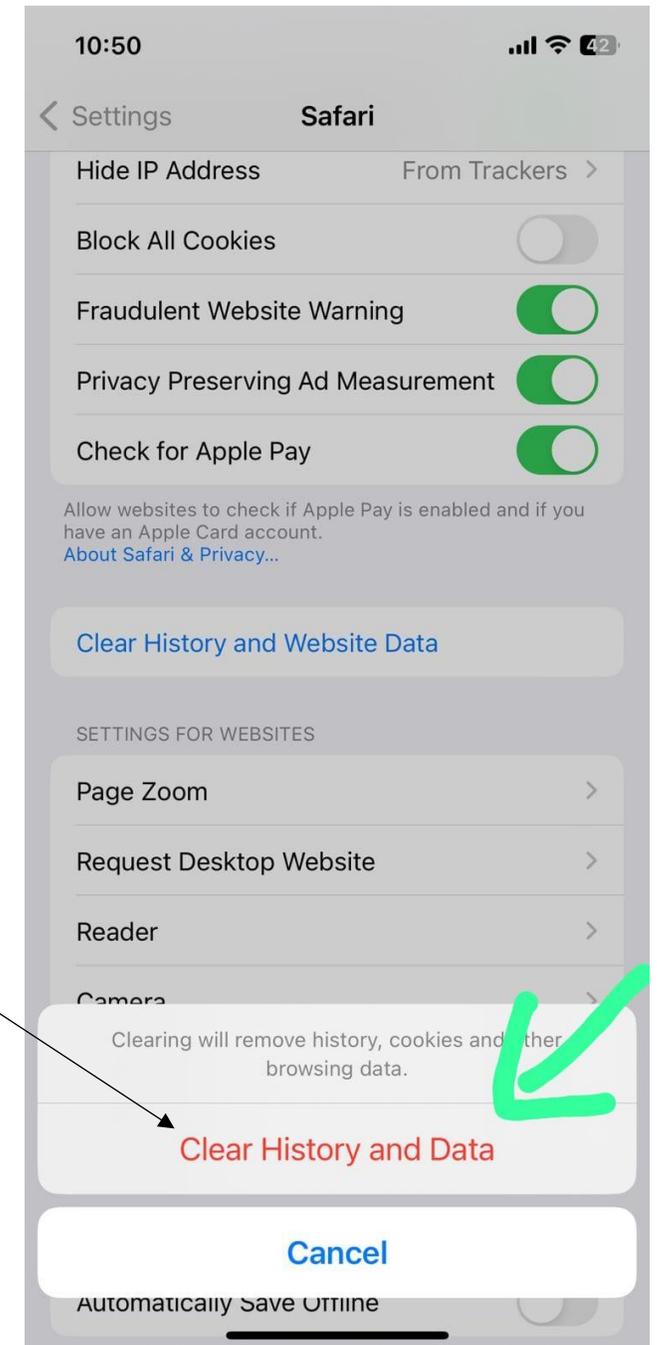

Step 2 -> Scroll down and go to "*Safari*"

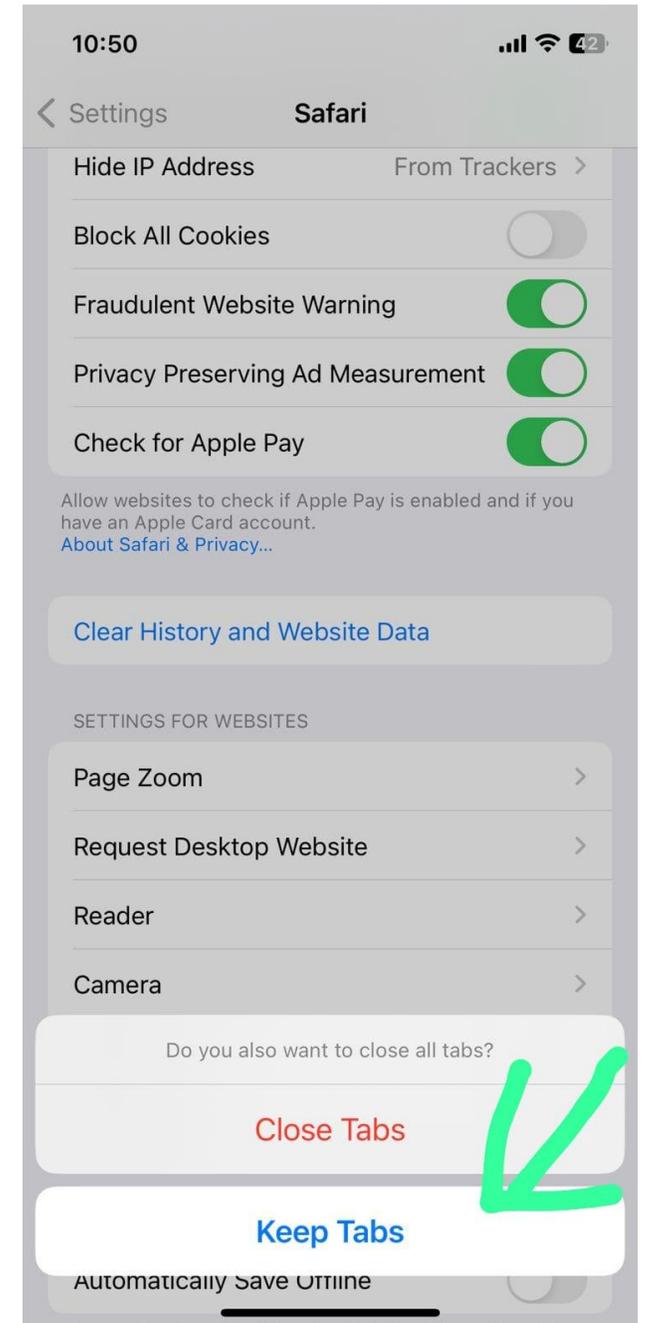

Step 3 -> Scroll down and click to "*Clear History and Website data*"

Step 4 -> Click to *“Clear History and Data”*

Step 4 -> Click to *“Keep Tabs”*

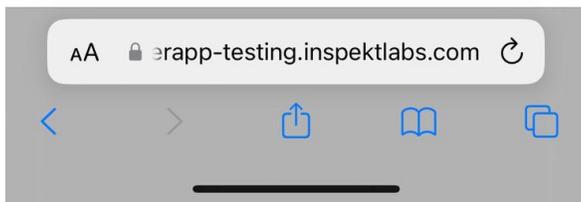

Before you begin, please ensure the following.

- 1 There should be enough space (at least 5 ft / 150 cm) around the car to capture the 360 degree video.
- 2 There is enough light in the area for a clear video.
- 3 Your car is clean and dust free.
- 4 Your device is connected to stable internet and camera is clean.

Proceed

Now refresh the Superapp

When you click "*Proceed*" button

App will ask "*Camera*" permission please allow this "*Allow*"
