

What do I want the learning look like?

- ★ Quick and easy access / no need log-in and tracking
- ★ Can be shared anywhere, anytime with a link or embedded code
- ★ The interactive or logical scenarios can be changed based on the interactivity of the learner.
- ★ Simple UI/UX when displaying the courses

Testing Typeform as a third party. Pricing plan can be an issue.

Why we don't need a full LMS?

		 Canvas	 SC Training (Edapp)
Hosting needed			
Share course content outside the LMS			
Require LMS admin and trouble shooting			
No flexible course flow			
Tracking + badges
