

# SOCIAL WORKERS AGAINST INACCESSABILITY

At institutions like Florida State, students with disabilities face daily challenges from navigating campus safely to accessing classrooms that meet their needs. This isn't just inconvenient, it's exclusionary. SWAI aims to ensure everyone can learn, participate, and thrive.

## REQUEST 1

Establish a committee comprised of faculty, staff, and students tasked with creating a university-wide document with solutions for overlooked course accessibility issues.

## REQUEST 2

Ensure that braille communication and labeling is consistent and accurate for all areas of campus.

## REQUEST 3

University makes consistent safety plans for construction workers to ensure accessibility is maintained.
