Focus on Fake

About Anooshe - Introduction

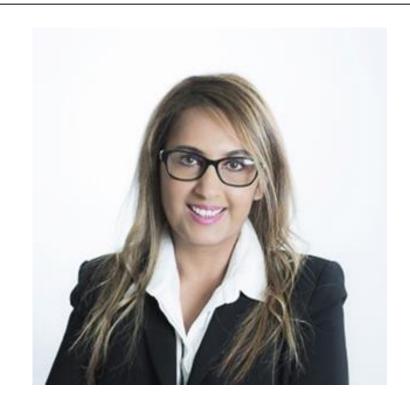

I live in Australia and I am based in Canberra

I have been working in the Information Technology, cybersecurity and IT security space for the past 17 years

I have managed projects for Department of Defence, Federal Government, Intelligence and National security

I have presented at several national security conferences and published regularly in Australian media. My focus has been social media extremism and countering violent extremism

Defence and Security Circle (DSC) of the National Liberal Club North Atlantic Treaty Organisation (NATO)

I would like to thank Noel Hadjimichael, the Defence and Security Circle of the National Liberal Club for inviting me to present on the impact of misinformation which circulates in social media and media platforms

I would also like to acknowledge and thank the Public Diplomacy Division of the North Atlantic Treaty Organisation (NATO) for funding DSC to conduct a number of events on the title

"Focus on Fake".

Focus on Fake

Social Media use in Asian communities

I am going to refer to the John Oliver show I watched recently on misinformation.

Pakistani parents

2005 – don't believe everything you see on the internet – be careful

2021 – I saw this on Facebook so it has to be true

SAMOSA LINKED TO CANCER CURE!

In the Upanishads, it is discussed that food containing तुला "tula" (balance in the fats, carbs, and protein) satisfy the mind, body, and spirit. Harvard scienteist now confirms ancient wisdom...!

MINT = good for blood circuluation and sharp mind TAMARIND = aids digestive system and fertility in women

SOURCE: HARVARD 2020

WESTERN FOOD AND MEDICINE DO NOT CONTAIN THIS ONE. PLEASE SHARE WITH FRIENDS AND FAMLY TO SHOW THE BEAUTY OF INDIAN CUISINE...!!!

Cyber Space

Social media platforms provides entertaining and funny information but it is also loaded with toxic rhetoric and hate speech posts.

We live in a digital world and we are connected via various mediums

It is important that we educate our youth so they understand the vulnerabilities on social media

Hate breeds Hate Toxic news has marginalising communities

In 2015 when the CVE policies were developed – The focus was Islamist extremism and terrorism

Australian Government and media alike, have poured extreme focus on the Islamic terrorist. The voice of the ordinary Muslim has been muffled, and their identity blurred into a mirage of extremism.

Due to these CVE policies focused on Muslims, now we are seeing the rise of Right Wing Extremism

Pauline Hanson's burqa ban stunt

Year 2017 - One Nation Senator Hanson walked into Senate dressed in the Islamic garment and called for a "burqa ban".

Misinformation about the burqa. There is confusion in the western world about hijab, burqa, head scarf or many other head covers which Muslim women wear. The type of head cover is dependent on various Islamic cultures.

The burqa which Senator Hanson wore is actually called the shuttlecock burqa. It is worn in some parts of Pakistan and Afghanistan.

There's other types head covers that are referred to as being niqab/hijab in parts of the Arab world.

So what was a impact of this Hanson's stunt? Major impact was marginalisation of Muslim women.

Fake news is not a new phenomenon

My article The Trap of us and them – how media is creating Australia's greatest national security threat was published in 2016. They key message in this article is that divisive rhetoric is toxic and dangerous. When we create division this feeds into the terrorist's narrative or criminal's narrative.

I ACCIDENTALLY MESSED UP MY LIFE, HOW DO I START A NEW ACCOUNT?

Dear Lord, please grant me the ability to punch people over the Internet.

Thank you
