## Profile

I am an author, poet, and thinker living between Slovakia and Norway. My life paradox – manual work in a factory and, at the same time, phenomenological and artistic creation – is the source of my originality. I introduce new concepts (Vortex, Metamisunderstanding, Pre-reflective Unity, Ontological Timelessness of Unity, De-functionalization of Object, ) which connect art, philosophy, science, and everyday life.

I create from lived experience (lucidity, transcendental states, boundary experiences), systematically archiving and structuring. My aim is to communicate these experiences and insights through poetry, lectures, and multimedia projects – both in the academic environment and for wider audiences.
