

**Use of GenAI Declaration @CSO**

*(Erforderlich)*

Did you use generative AI tools to assist with the conceptualization of ideas or during the literature review process?

No

Yes

Please specify how generative AI contributed (e.g., generating research ideas, summarizing literature, identifying key references).

---

---

Did you use generative AI in designing the research or drafting the research/fieldwork protocol?

No

Yes

Describe its role (e.g., generating survey questions, assisting with participant communication).

---

---

Did you rely on generative AI to identify or evaluate resources or analysis tools for your research?

No

Yes

Which tools or resources were identified or evaluated using generative AI?

---

---

Was generative AI used for data curation, data analysis, or formal analysis?

No

Yes

Explain the specific tasks (e.g., cleaning data, generating insights, summarizing data).

---

---

Did generative AI assist with the use of software tools for data analysis?

No

Yes

What specific functions or processes were enhanced by generative AI?

---

---

Did generative AI contribute to discussing or interpreting the research results?

No

Yes

Please elaborate on how it supported this phase (e.g., generating discussion points, evaluating findings).

---

---

Was generative AI employed to analyze the potential for replication or reproducibility of the research?

No

Yes

In what way did it assist (e.g., suggesting replication strategies, identifying reproducibility challenges)?

---

---

Did you use generative AI for drafting the research article?

No

Yes

Specify the sections or content it contributed to (e.g., introduction, methodology, conclusions).

---

---

Was generative AI used to review or refine draft versions of the article?

No

Yes

What types of improvements or suggestions were provided (e.g., grammar, clarity, coherence)?

---

---

Did you use generative AI to create diagrams, tables, or visualizations?

No

Yes

Describe the specific outputs generated (e.g., visualizing data, conceptual diagrams).

---

---

Was generative AI employed in managing or administrating the research project?

No

Yes

Provide examples of its use (e.g., task planning, progress tracking, resource management).

---

---

---
