

• WE'RE HIRING • START ANYTIME

Internship

BUSINESS · FINANCE · SALES

Help us grow an AI company **from the inside.**

deAI Labs builds **Mira OS** — the EU-hosted context layer that turns scattered company knowledge into something AI can actually use. We're early, moving fast, and looking for a sharp generalist who wants **real ownership** across business, finance and sales — not a coffee run.

A EVERYTHING IT TAKES

- **Go-to-market support:** build target lists, prep outreach, join sales calls.
- **Sales ops:** keep the CRM clean, track pipeline, chase follow-ups.
- **Finance & numbers:** help with pricing models, simple forecasts, reporting.
- **Decks & docs:** turn messy input into clear one-pagers and proposals.
- **Research:** markets, competitors and prospects across DACH and UK/IE.

B WHAT YOU BRING

- Studying business, economics, finance — or self-taught and hungry.
- Comfortable with spreadsheets and structured thinking.
- Clear written English; German is a real plus.
- Proactive and organised — you ask, you own, you follow through.
- Curious about AI and how B2B software gets sold.

WHY DEAI LABS

Founder-led

Work side by side with the COO and CEO — direct, fast feedback.

Real scope

Own meaningful pieces of the business from week one.

Full view

See a B2B AI startup end to end: product, money, customers.
