## YOUR GUIDE TO AI

### AI Scam Protection Checklist

#### 1. Always Confirm the Source

- ☐ Type the web address yourself. Only trust official websites you enter manually.
- ☐ Check for HTTPS and the company's \*exact\* domain name—not something close.
- ☐ Never click links in pop-ups, unexpected emails, or random text messages.

#### 2. Pause Before Responding

- ☐ If it feels urgent, it's probably a scam. Scammers pressure you to act fast.
- ☐ Never rush to send money, click, or reset a password without verifying first.

#### 3. Protect Your Personal Info

Never share any of the following with AI tools or unknown contacts:

- ☐ Social Security number
- ☐ Bank account or credit card details
- ☐ Passwords or verification codes

Even realistic-sounding messages may be AI-generated phishing attempts.

#### 4. Watch for AI-Enhanced Tricks

- ☐ Voice cloning: A 'relative' calls in distress? Hang up and call them directly.
- ☐ Fake emails: Perfect spelling and logos don't prove it's real.
- ☐ Imitation websites: Check the URL carefully—one letter off can mean fraud.

## 5. Verify Before You Trust

- ☐ Call the company using the number on your card or their official website.
- ☐ Confirm emergencies with another family member before sending money.
- ☐ Ask a trusted friend before acting on anything unusual.

## 6. Golden Safety Habits

- ☐ Type, don't click—go directly to official sites.
- ☐ Hang up on suspicious calls—and call back using a known number.
- ☐ Confirm details before you act. If it feels off, stop and check.
- ☐ Treat all urgency as a red flag.

## If You Think You've Been Targeted

- ☐ Stop communication immediately.
- ☐ Do not send money or share more information.
- ☐ Contact your bank, credit card company, or local fraud hotline.
- ☐ Tell a trusted family member—scams thrive on secrecy.

Tip: Print this checklist and keep it near your phone or computer. If you are ever unsure about AI, refer to this checklist.

Disclaimer: This checklist is for educational purposes only. It does not constitute legal, financial, or medical advice. While updated regularly, AI-related scams and risks may change over time. Always use your own judgment and consult qualified professionals if you need specific advice.
