12	Tom Habgood	M45	SB0C	57.21
13	Cris Arnold	M50	SB0C	61.59
14	Sasha Habgood	W40	SB0C	62.05

Hope you enjoyed the use of the eastern slope of the Bryn. I had spent quite a bit of time updating that section of the map so wanted to make full use of it – hence the map exchange on the Green course. If you left your first map at the exchange and want a copy of that please let me know by email soon and I'll bring it along to a future event for you.

Thanks to Sarah, Sasha, Tom, Freddie and Millie for collecting in the controls.

3 people did not punch at the map exchange but have not been disqualified.

One of the advantages of the map exchange was that no control was more than 1km from the car park which made putting out and collecting easier. The club has recently bought a new colour printer which may assist planners to be creative about the types of event we hold locally. It is good to have some variety in the type of events which make up the summer league. Whilst the 4 course format provides for progression for those learning the sport, so long as we can produce a set of results and we provide for novice and experienced orienteers then that seems to satisfy the needs of the Summer League.

The splits printer seems to have a problem – looks like it is just the connector for charging (so despite being plugged in overnight on Tuesday it lost power during the event). All times were saved to the download box though. Luckily Mark had another printer which helped some people get splits. I suggest future organisers record start and finish times as a backup until we are sure of the problem and have fixed it.

Roger Stein
