Sorry the results have taken a time to produce but the SI results unit has produced some very odd times, with some people having a finish time before they started and some not having a time at all. So
I have had to calculate them all manually, it also seems that everyone on the Green has had an extra 7
mins added to their time, I have not changed these at it seems consistent.
There was some debate about control sites 10 and 11 on the Green, but as these sites had been used in
the past (at the Future Champions Cup race), I was confident they were fine. In reflection though I do
think that part of the map needs updating as there is more control detail on the ground than on the map. Hopefully this can be rectified.
Thanks to those who turned up. Many thank to Gill for helping to collect controls etc.
