Hope you all enjoyed your runs – we had an excellent turnout. Looking at the finish times it looks like the light green course was a bit long. The green course encountered a lot of water at its furthest point and there were a few grumblings, but all I can say is that it wasn't like that when I checked the sites a few weeks before! Apologies for the two #2s on the green and light green courses, hope this didn't cause too much confusion.

There were some fast times recorded, the most notable from Ben Mitchell who ran well under 30 mins. Stephen too had an excellent run and will have to borrow Phil's '0' shoes again!!

Massive thanks to Dave Seward, Chris Lewis and Phil for helping to collect controls and an even bigger thanks to Hannah who helped me put out the controls and ran the registration.

As you're all aware putting on this event taught me a valuable lesson in using SI – the dibber fills up and stops working after about 30 controls and so gives the impression that the units have switched off.

See you all next week at Whiteford Burrows
