

CLINICAL FORMS

MILD (stage 1)
ANICTERIC

self-limited
4-7d

10% develop
(BIPHASIC)

Weil's disease
SEVERE (stage 2)
ICTERIC
ICTERO-HEMORRHAGIC

↑ MORTALITY ☠

SYSTEMIC SPREAD

MULTI-ORGAN DAMAGE

FEVER

↳ CHRONIC FATIGUE syndr. can be a complication

MUCOUS MEMBRANES

CONJUNCTIVAL SUFFUSION

↳ spread to other eye parts
↳ BLINDNESS ☠

GI

diarrhea vomiting

MYALGIA

RASH

transient macular

ASEPIC MENINGITIS

headache photophobia

↑ cells in CSF (pleocytosis)

HEPATITIS

H-MEGALY JAUNDICE

RENAL FAILURE

ATN INTERSTIT. NEPHRITIS
OLIGURIA/HEMATURIA

↑ BLEEDING
(Generalized VASCULITIS)

PURPURA HEMOPTYSIS
! pregnancy → abort/ol. premature

CARDIAC

Myo-peri-Arhyth.

RHABDOMYOLYSIS

can lead to **ENCEPHALITIS** {neuro psych} signs
