

# KEN OKPARAEZE

## JUNIOR WEB DEVELOPER

### SUMMARY

Begun career as a web development intern, specially dedicated as PHP programmer for the company's proprietary CMS. Through the internship, experiencing product and repository management, communication with PM, AWS configurations, server monitoring, and CI tool setup laid my basement in web development.

Also having an opportunity to distribute a product as a Product Manager, overseeing LMS add-ons, resource management, and documentation established my communication skills. Currently, working as a freelancer based in Tokyo, since June 2023, under the business name "SLAP". (stands for "Single Level Abstract Programming") Aiming to manage system development projects across various industries, next-generation technologies, and the globe with my multicultural background.
