Improvised Roleplay

Prepare for a difficult situation by simulating it and drawing up a checklist of best practices.

Participants improvise a role-play based on a given situation. They are divided into groups of three. In each group, two participants act out a given situation while the third observes. The roleplay lasts three minutes. The observer then shares their constructive feedback. The scene is then replayed, taking the feedback into account. This cycle is repeated one last time to refine how the situation is handled. At the end of the three rounds, each participant draws up a checklist of best practice
