Educational AI Hackathon

Prototyping an AI assistant designed for synchronous educational animation, based on real-life cases from the field

During this two-hour collaborative workshop, participants, organised into teams, identify specific needs related to their practices, draft a structured prompt, define the assistant's contributions, and then present their prototype to a jury.
The activity combines collective intelligence and generative AI with a view to transforming teaching methods.

Number of participants: 8 - 32

Estimated duration: 2h

Duration	Step name	Notes	Mode and Rights	Content	Tools
10 mins	Welcome & Introduction	**Notes** - Welcome participants - Present the session objectives - Launch the polls - Present the session schedule			How would you describe your current use of AI (such as ChatGPT, Claude, Copilot, etc.) in your profession? What do you hope to gain from this two-hour session?
5 mins	Ideation phase - Instructions	**Notes** - Present the instructions - Divide the participants into groups
