Envelopes

Generate ideas for solutions to different problems

In this activity, participants are divided into teams which tackle a topic through a series of related issues. Each team takes it in turn to deal with each issue, listing as many possible solutions as possible. The teams do not have access to the lists drawn up by the previous teams until the final round, at which point they analyse them and award points to rank the solutions. At the end a restitution enables the group to calculate the points collected by the teams and determine the winning one.
