CODEV

Solve a problem by harnessing collective intelligence

CODEV is a collective intelligence facilitation method that promotes the improvement of practices through group sharing and learning. This activity enables participants to collaborate openly and constructively to solve a problem. During the activity, participants propose situations that they find challenging and wish to resolve. One situation is selected, and the participant who proposed it becomes the client. The others become consultants and help explore the situation and find solutions.

Nombre de participants: 4 - 12

Durée prévisionnelle: 1h30

Durée	Nom d'étape	Notes	Mode et Droits	Contenus	Outils
5 mins	Activity presentation	**Notes** Explain the objective of the activity and how it will be carried out to the whole group.
