FOR IMMEDIATE RELEASE

New Snapperhead™ Overdrive/Distortion Pedal
Deliver Unique Features for Guitarists

Rock Musicians Get Special Attention from SynapticGroove

Edmond, OK – August 11th, 2013 – Offering pedal geeks and tone freaks a truly unique overdrive/distortion, the Snapperhead™ is an analog pedal for guitarists that have “tried everything else”.

The Snapperhead™ pedal offers an unprecedented array of features in an affordable package for the studio, session, pro and weekend warrior players. In addition to being 100% handmade in the U.S.A., it comes with these defining elements:

A voice range from overdrive to distortion without tone coloration
Simple controls that make dialing in your tone heavenly
Unique tri-color LED that looks groovy and lets you know when your battery is dying
The absolute best components available on the market today

The new pedals have already earned the embrace of professional players. [REDACTED] are jamming the Snapperhead™ pedal on their tours and taking it in the studio for those late night sessions.

The Snapperhead™ carries an MSRP of \$155.00
