## **European AI Forum Welcomes New Members Strengthening the Voice of AI Innovators Across Europe**

The European AI Forum (EAIF) is proud to announce the expansion of its network with the addition of **AI Sweden** as our newest member organisation, alongside three new associated members: **AI Albania**, the **Georgia Artificial Intelligence Association**, and the **Serbian AI Association**.

As Sweden's national center for applied artificial intelligence, AI Sweden plays a pivotal role in accelerating the use of AI to benefit society, boost competitiveness, and drive innovation across sectors. With more than 160 partners and a multidisciplinary team of over 80 experts, AI Sweden leads bold, collaborative projects that strengthen Europe's position in the global AI landscape.

The inclusion of new associated members from Albania, Georgia, and Serbia highlights the EAIF's commitment to strengthening collaboration across the wider European continent. It reflects our belief that advancing AI requires cooperation that spans borders and sectors, while remaining anchored in shared values: democracy, sovereignty, transparency, and the responsible use of technology for the benefit of all.

With these new members, the European AI Forum now unites over 2,000 AI innovators through 10 member organisations and 3 associated members, forming the largest AI alliance in Europe. Together, we represent a diverse and powerful coalition working to shape the future of AI in Europe.

Looking ahead, the EAIF will continue to advocate for policies and conditions that empower AI entrepreneurs to develop solutions that serve people, businesses, and society. With our expanding network, we are more determined than ever to shape the global conversation on AI from a distinctly European perspective.

**About the European AI Forum**

The European AI Forum (EAIF) connects the most innovative AI and Deep Tech companies across Europe with established industry and policymakers, representing over 2,000 AI entrepreneurs through our 10 member organisations and 3 associated member organisations to form Europe's largest AI network. The members of the European AI Forum are committed to ensuring that AI technology is applied in accordance with European and democratic values, helping Europe achieve digital sovereignty. To achieve this, the European Union must become an attractive AI location for entrepreneurs, where risk-taking is valued and innovative spirit meets the best conditions.

**Member Organisations**

CroAI (Croatia), Hub France IA (France), KI Bundesverband (Germany), AI Cluster Bulgaria (Bulgaria), NL AI Coalitie (Netherlands), Digitalpoland foundation (Poland), Artificial Intelligence Association of Lithuania (Lithuania), Česká asociace umělé inteligence (Czech Republic), AI Austria (Austria), AI Sweden (Sweden)

**Associated Member Organisations**

AI Albania (Albania), Georgia Artificial Intelligence Association (Georgia), Serbian AI Association (Serbia)
