The above want list was made up before the availability of "IV Teil" - Future want lists should be numbered according to the catalog. However, I will try to locate notes regardless of catalog used, or if no catalog is used provided description is adequate.

Collectors who do not read German will still find the notgeld catalogs to be of great service. One can soon learn to use the listings by memorizing a few of the abbreviations. However, someone should translate the text into English. If the publishers have no plans for this, perhaps "we" should look into it. Any volunteer translators?

This "mailing" of the Notgeld Newsletter is going out to several hundred collectors who have previously indicated some interest. Due to high costs, any future mailings will go ONLY to those responding in some way. Do you have notes for sale? Are your duplicates available to help fill want lists? Are there categories, towns, topics or specific notes you want? Maybe you wrote to me before and I could not help. Try me again.
