Insert the Net Radiometer inside the holder.

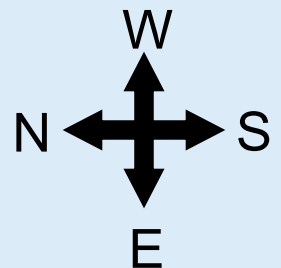

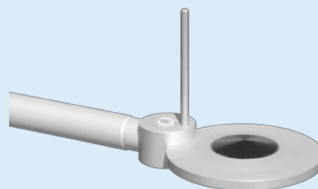

Holder

Radiometer

3

Point the Net Radiometer holder to the south, south-east, or south-west.

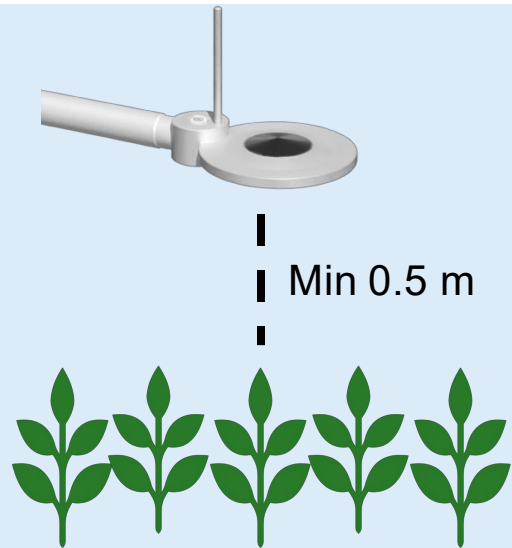

Installation

Placement: Net Radiometer

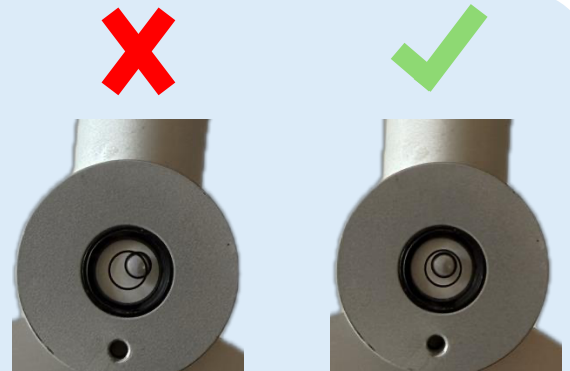

4

Position the net radiometer a minimum of 0.5 m above the head of the crop canopy.

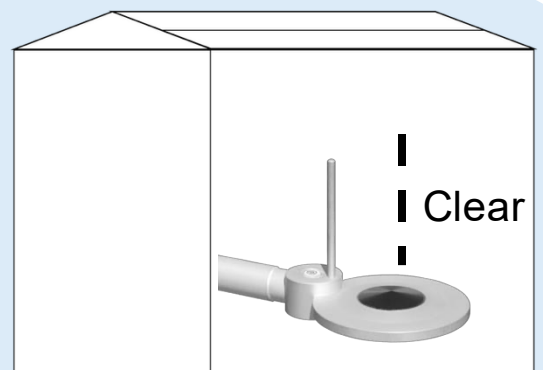

5

Position the Net Radiometer correctly levelled using built-in the spirit level

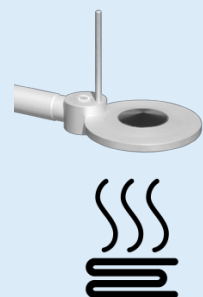

6

Minimise any shadowing effect from above greenhouse structures.

7

Avoid placing the Net Radiometer directly above heating pipes.

Installation

Placement: Net Radiometer

Examples of good placement
