

INSTALLATION FILES

2025

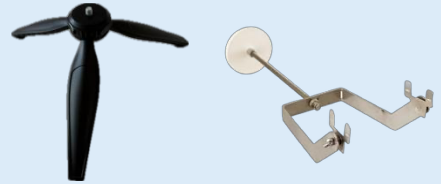

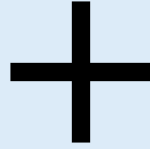

Installation

Placement: Air+ / Air Pro+

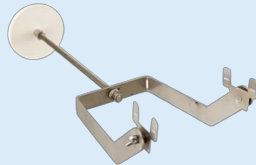

Attach the tripod/holder to the Air+ unit

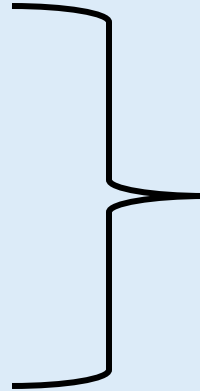

Air+

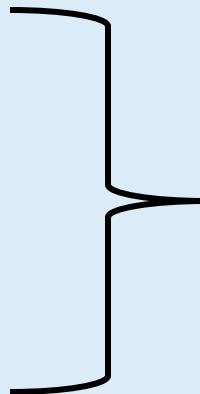

Tripod/Holder

Holder

Tripod

1

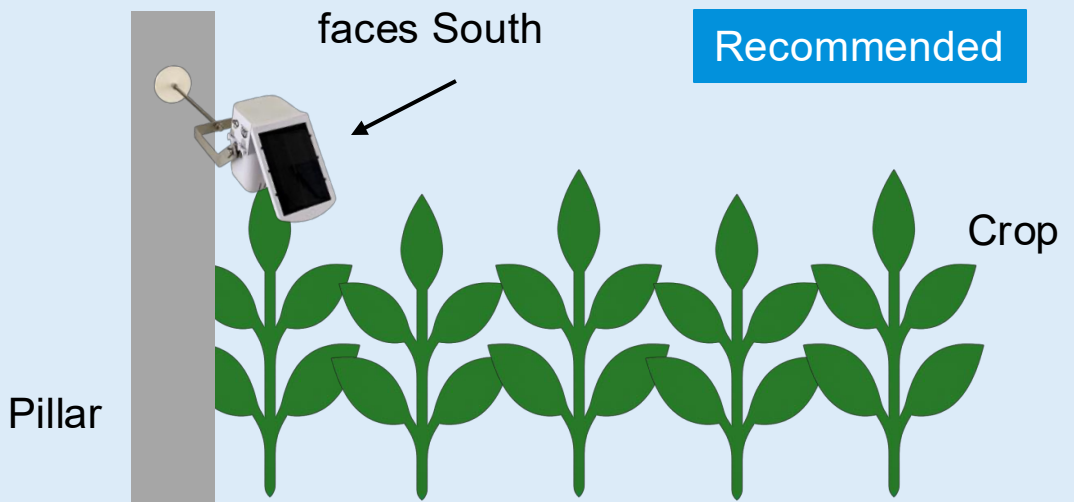

Installation

Placement: Air+ / Air Pro+

We recommend placing the sensor as close as possible to the crop, as to measure the plant microclimate.

If you wish, you could also place it higher in the greenhouse.

2

alternative

3

We recommend placing the sensor as level/straight as possible.

The level part has to be the top of the sensors.

Parallel to the ground

Installation

Placement: Air+ / Air Pro+

Examples of good placement
