

Where Are the Jobs?

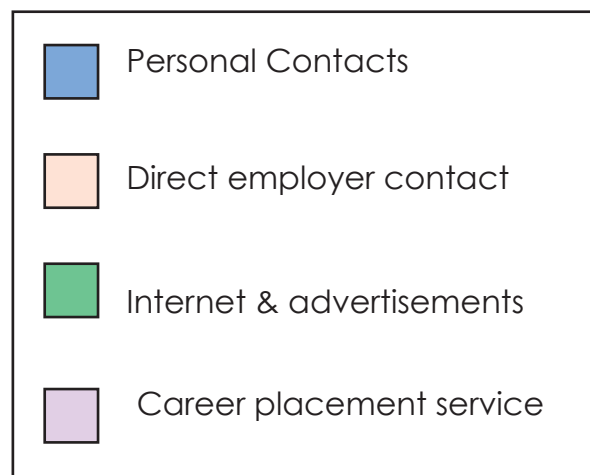

Directions: Find three other students who have cards with the same color as your card. Put your cards together to complete the set of cards from 1-4. Read the information on the four cards and answer the following questions:

1. From this information, how do most people find their jobs?
2. What percentage of people find jobs by contacting employers directly?
3. How many people out of 100, who are looking for jobs, find them using the want ads?
4. How effective are employment agencies in finding jobs for people?
5. How many people find jobs through people they know?
6. How much will you use help-wanted ads during your job search? Why?
7. Now that you know where the jobs are, what will be your first step in finding a job?
8. What is the best way to find a job? Why?

How People Find Jobs

Note: 4% of the jobs were found using other methods such as union hiring.
