Job Find Cards

To make the cards:

- 1. Duplicate this template for every four students.
- 2. Using markers or crayons, color the center circle of the template one color so that the set of cards (1-4) can be matched by color after being cut apart. Color additional templates different colors. For example one set of cards will be red, another blue, another green, etc.
- 3. Cut out the cards to make sets of four and distribute one card to each student.
- 4. Students form groups of four by finding three other students with the same color on their cards. Each group should be represented by one full set of cards 1-4 with the same center color.
