

Framing

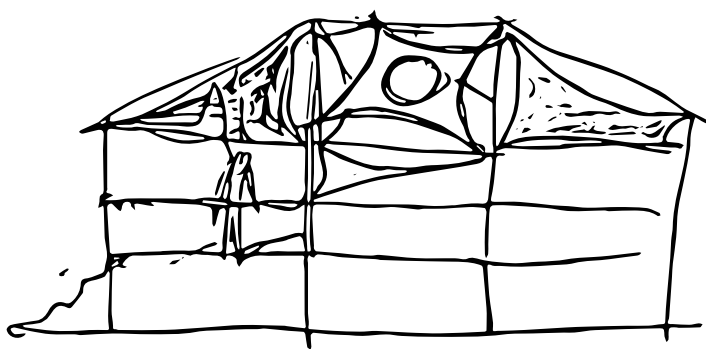

Guiding Attributes

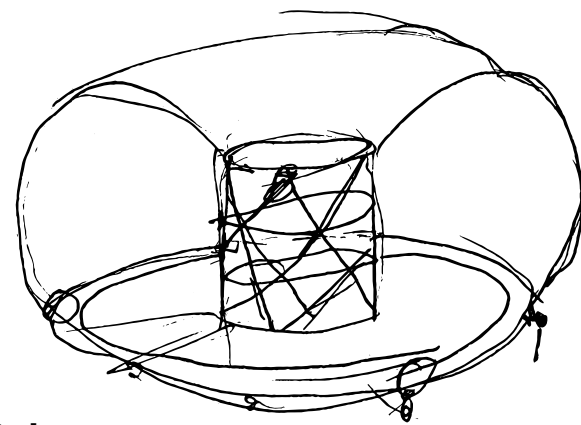

- + Destination for teens, by teens
- + Solar powered, pedal powered
- + Interactive
- + Daylife, nightlife
- + Comfortable & cool

Guiding Values

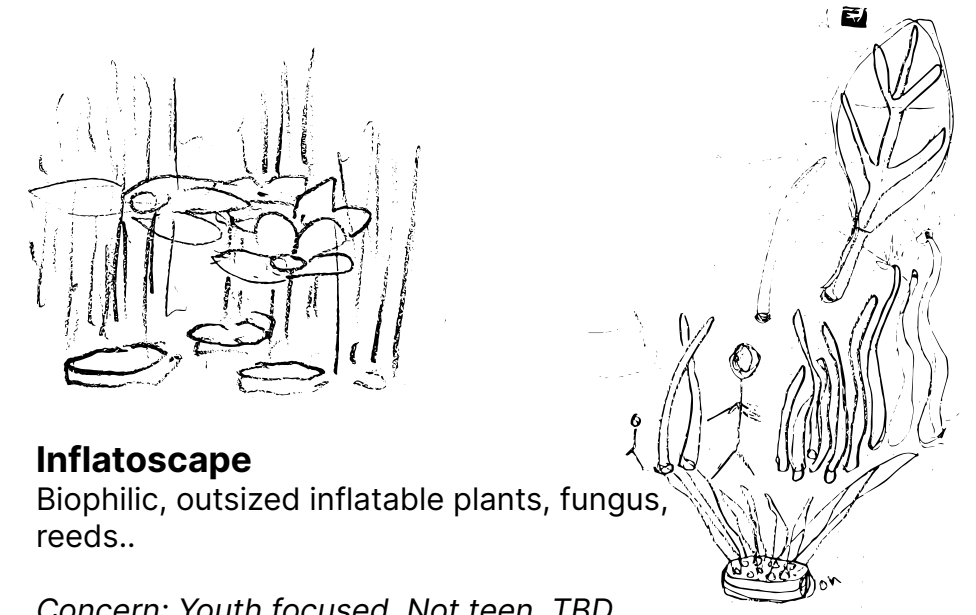

Ideas and Concepts

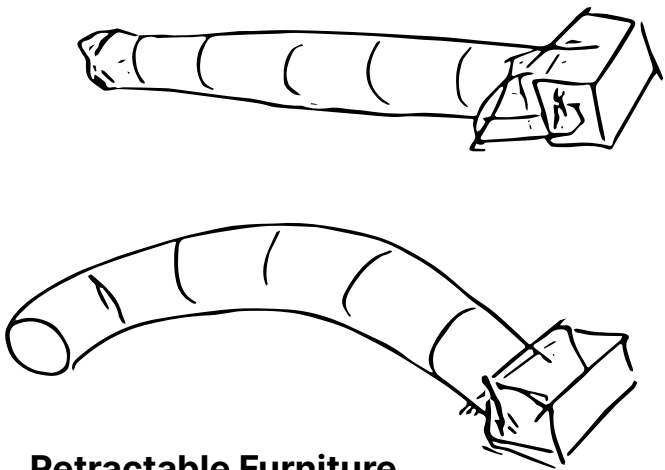

Homemade Shade
Scaffolding structure, optimally with elevation gain, with homemade textile shade sails.

Columnar
An inflatable or other fabric uncoiling out of a column

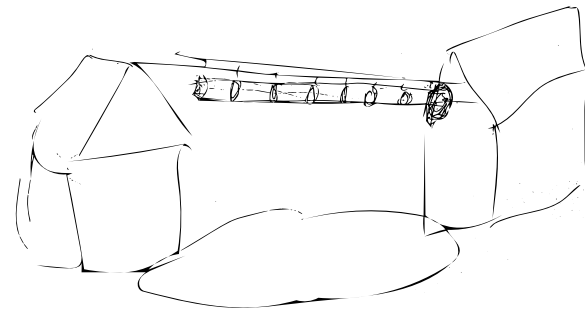

Inflatoscape
Biophilic, oversized inflatable plants, fungus, reeds..
Concern: Youth focused. Not teen. TBD.

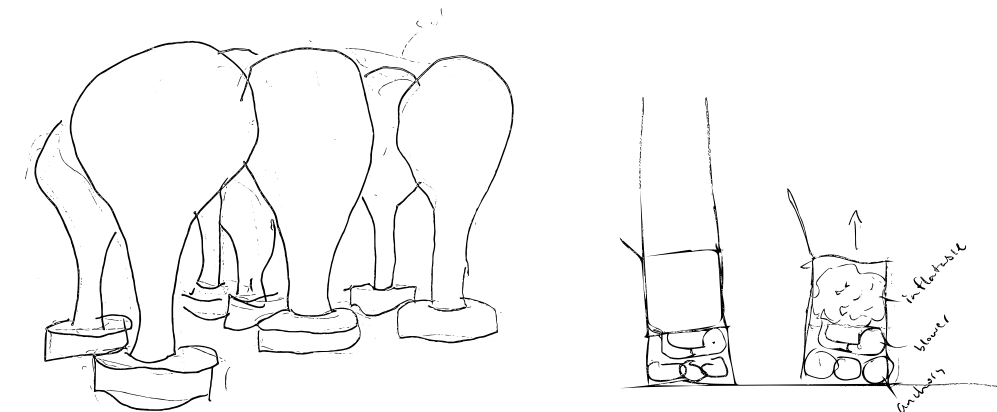

Retractable Furniture
The idea of having seating and other elements inflate and deflate, with "the touch of a button," in and out of a modified site box (jobox, etc.).

Easing set-up and take-down.

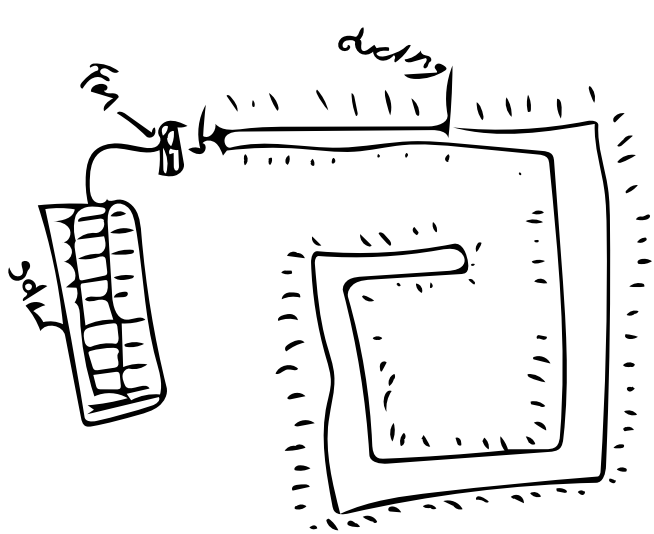

Retractable Lighting
A retractable lighting system, perhaps coming in and out of a protected box or other.

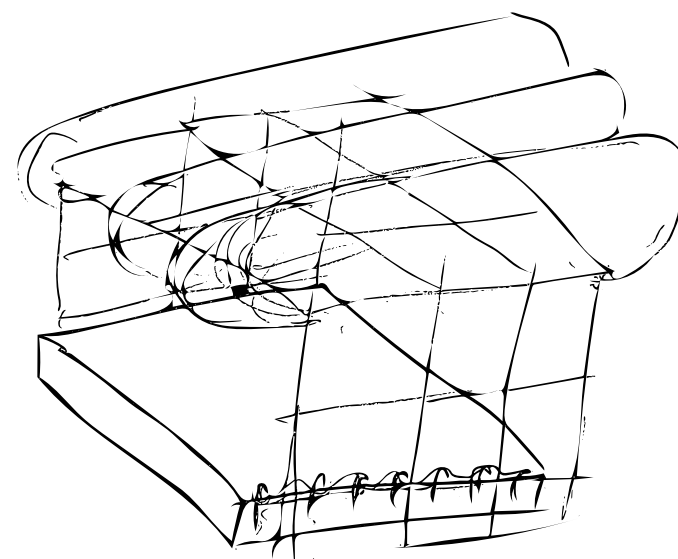

Retraction could be bike-powered?

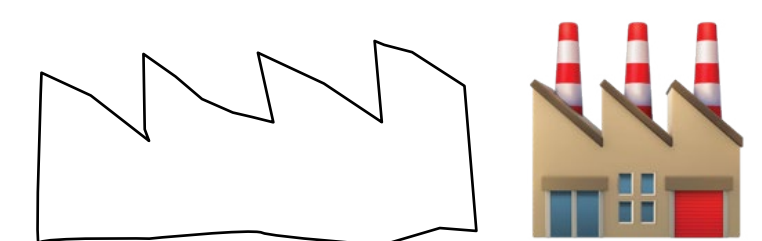

"Tree" Trunks
Free-standing, inflatable shade, with seating at bottom. Water weighted. Inflator and material all stored in trunk.

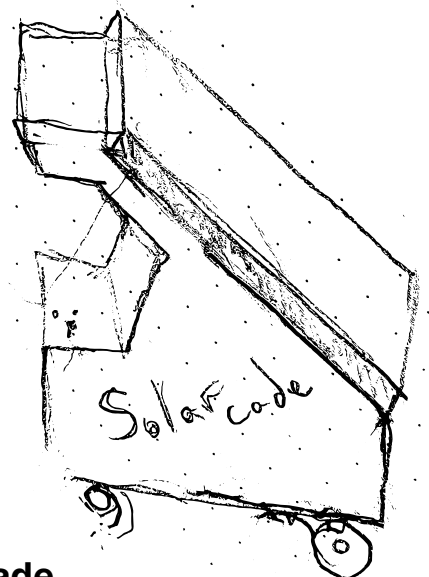

Inflatable Ductwork
How might services - air, water, be delivered through inflatable or fabric ductwork. How might power be channelled along similar pathway?

Stage & Inflatable Roof
Achieves spectacle, not material or cost efficiency...

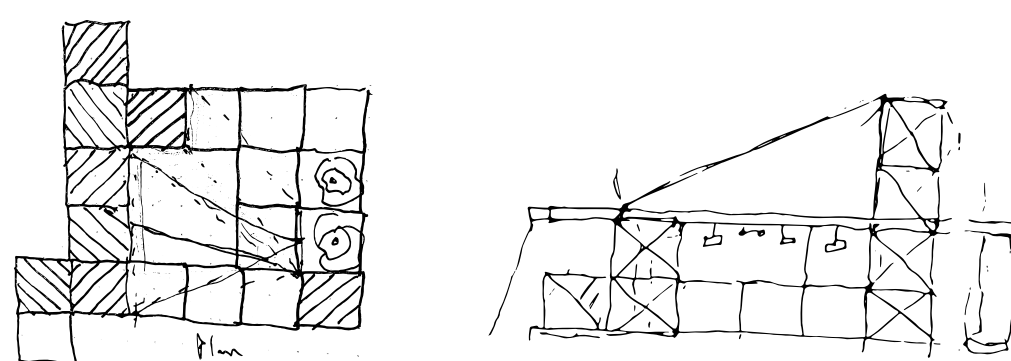

Factory
Finding an iconic, emoji-driven form...

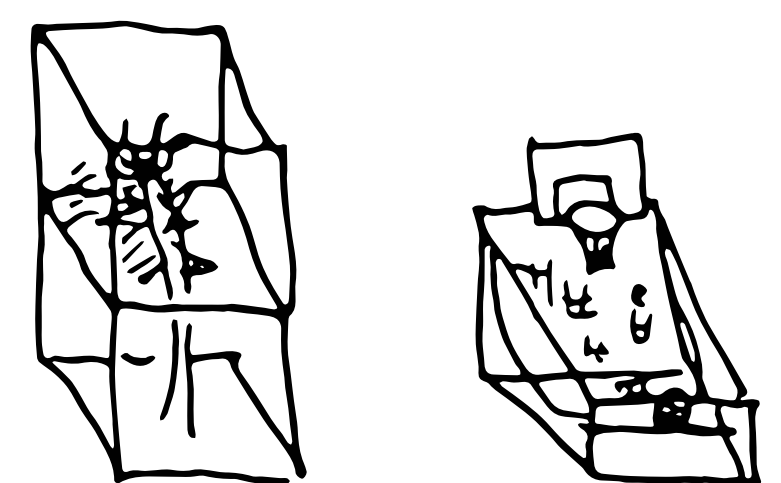

Solar Arcade
A charismatic object that is solar powered. Vintage arcade games - Crusin' USA, mortal combat. On wheels.

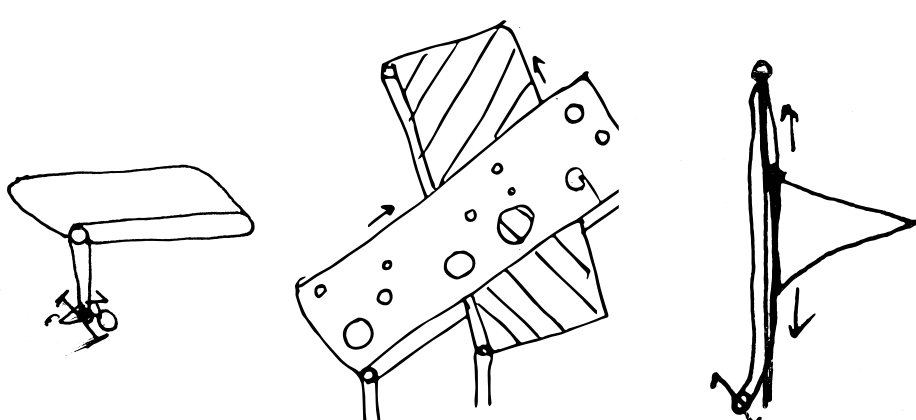

An inflatable darkening half-dome to block light for players would be necessary

Scaffolded Stage
A large, scaffolded, theatrically inspired space. With inflatable and or textile roof.

Cubic System
A simple pipe and clamp scaffolding inventory of elements. A tree well, free throw machine.

Scrolling Textiles
A pedal powered scrolling textile that can change the color of the space underneath. Pedal control for effect.
