Include
- ● Skip Tutorial
- ● Enable tapping anywhere on the screen to get to the next slide

IDEA: Could have a "cool feature" guide after the "general feature" guide. The user is shown cool features (ie: red packet, NFT profile customization, etc. features that we want them to actively use or features that provide some sort of valuable data for us) and once they use the feature, they are rewarded $ONE (can be max 10 $ONE).
ie: we show them how the red packet works and there is a challenge for them to share 1wallet download link with two friends, onboard them, and send them a red packet. Once all actions have been completed, app is triggered to send them $ONE. This helps user get familiar with our features and creates network effect (2 wins).

Idioms
- ● The best of both worlds
- ● A penny for your thoughts
