

# omnisig

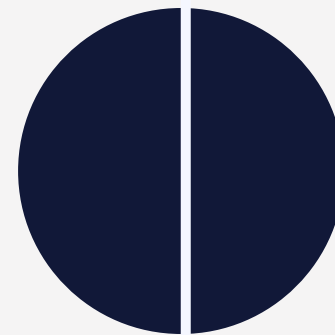

We aspire to be the Gnosis  
Safe challenger  
and be the DAO's  
comprehensive solution for  
safe + wallet

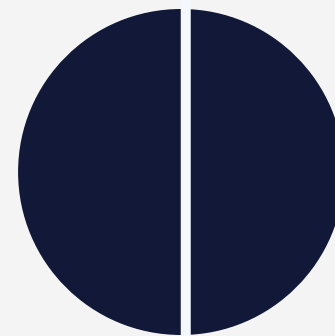

**A secure, simple but comprehensive solution** for DAOs by incorporating a multisig safe for Treasury and operational wallet to effectively run a DAO.

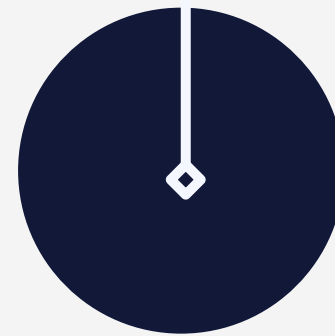

Full range of capabilities required to **manage and increase value of Treasury** including staking, swapping, de-fi like liquidity pooling, yield farming, etc.

**Operational ease of use** – including batch processing, automated recurring transactions, push notifications, reviewer/ approver controls, etc. Include HR and benefits modules.

**Accounting and Reporting transparency** – ability to automatically generate reporting for the DAO (revenue, expenses, investment gains/ losses, risk management, etc.)

**Simple and seamless UX** to accelerate on-boarding of crypto/ web 3 beginner. **Cross chain interoperability** through secure bridges.
