UMBRA®

Nice Action 230v motor setup

Legend					
A	Power Cable A1 = Brown wire A2 = Black wire A3 = Blue wire A4 = Yellow-green wire	1	Connection of a two-button control panel. Note – the TTU programmer must only be used to program the motor	4	Motor mains power disconnect
B	Electronic motor head	2	Earth connection	5	Fuse
C	Limit switch adjustment buttons	3	Connection to the mains (see the motor's nameplate ratings)		

Before You Start – Important Information

UMBRA®

- A TTU programming tool is required to setup this motor. Alternatively you can also use a two-button push button panel, as long as this allows you to press the two buttons at the same time and allows the buttons to return to their previous position, when they are released.

- When operating the blind with the TTU programming unit you must always press and hold the command buttons to make it move, even after limits are set
- When no limits are set, the blind will jolt twice before moving when pressing and holding one of the command buttons
- When one limit is set, the blind will jolt once before moving when pressing and holding one of the command buttons
- After an obstacle has been detected you will need to run the blind away from the obstacle before you can continue in the original direction of travel.
- If the blind unexpectedly stops during travel it may be caused by the obstacle detection function detecting extra resistance. This can be caused by the blind being fitted out of square or in the case of a zip blind, something in the channels.

Changing The Turning Direction

Connect the TTU programming tool as shown:

Green/Yellow = Earth

Blue = Common/Neutral

Black = Turning Direction 1

Brown = Turning Direction 2

Try driving the blind down, if it travels up you will need to swap the black and the brown cores around.

Setting Limits

IMPORTANT: if one step of any process is done incorrectly the action will not be complete and the motor must be left for 5+ Minutes before a second attempt is made

UMBRA®

Set the top limit position first

Use the ▲ ▼ buttons to move the blind to the position required for a top limit

Press and hold the ▲ ▼ buttons together until the blind shunts

Top limit set

Setting the bottom limit position

Use the ▲ ▼ buttons to move the blind to the position required for a bottom limit

Press and hold the ▲ ▼ buttons together until the blind shunts

Bottom limit set

Adjusting The Limits

IMPORTANT: if one step of any process is done incorrectly the action will not be complete and the motor must be left for 5+ Minutes before a second attempt is made

UMBRA®

Fine tuning the top limit after it has been set

Move the blind to the top limit position

Short-press the buttons on the head of the motor to micro-adjust the limit position. Each press = approx. 2° of rotation

Hold down ONE of the buttons until the blind shunts to confirm the new limit position has been set

New top limit set

Fine tuning the bottom limit after it has been set

Move the blind to the bottom limit position

Short-press the buttons on the head of the motor to micro-adjust the limit position. Each press = approx. 2° of rotation

Hold down ONE of the buttons until the blind shunts to confirm the new limit position has been set

New Bottom limit set

Changing Top Limit

Changing the top limit position

IMPORTANT: if one step of any process is done incorrectly the action will not be complete and the motor must be left for 5+ Minutes before a second attempt is made

UMBRA®

Move the blind to the top limit position that has already been set

Press and hold the ▲ ▼ buttons together and watch the blind for two movements
KEEP HOLDING BOTH BUTTONS

Immediately release the ▼ button but
KEEP HOLDING THE BUTTON ▲

Press and release the ▼ button 3 times but
KEEP HOLDING THE BUTTON ▲

KEEP holding the ▲ button until the blind shunts
NOW RELEASE THE ▲ BUTTON

Use the ▲ ▼ buttons to move the blind to the new top limit position

Press and hold the ▲ ▼ buttons together until the blind shunts

New top limit set

Changing Bottom Limit

IMPORTANT: if one step of any process is done incorrectly the action will not be complete and the motor must be left for 5+ Minutes before a second attempt is made

UMBRA®

Changing the bottom limit position

Move the blind to the bottom limit position that has already been set

Press and hold the ▲ ▼ buttons together and watch the blind for two movements
KEEP HOLDING BOTH BUTTONS

Immediately release the ▼ button but
KEEP HOLDING THE BUTTON ▲

Press and release the ▼ button 3 times but
KEEP HOLDING THE BUTTON ▲

KEEP holding the ▲ button until the blind shunts
NOW RELEASE THE ▲ BUTTON

Use the ▲ ▼ buttons to move the blind to the new bottom limit position

Press and hold the ▲ ▼ buttons together until the blind shunts

✓
New bottom limit set

Obstacle Detection

IMPORTANT: if one step of any process is done incorrectly the action will not be complete and the motor must be left for 5+ Minutes before a second attempt is made

UMBRA®

Setting Up Obstacle Detection

Press and hold the ▲ ▼ buttons together and watch the blind for two movements
KEEP HOLDING BOTH BUTTONS

KEEP holding the ▲ ▼ buttons together and watch the blind for three movements
KEEP HOLDING BOTH BUTTONS

Immediately release the ▲ button but
KEEP HOLDING THE BUTTON ▼

Press and release the ▲ button 3 times but
KEEP HOLDING THE BUTTON ▼

KEEP holding the ▼ button until the blind shunts 3 times
Now release the ▼ button

Calibrate the sensitivity:

- Fully open the blind
- Fully close the blind
- Fully open the blind
- Fully close the blind

Obstacle detection

NOTE:
When the blind stops at an obstacle, it must be driven away from the obstacle before the original direction of travel can be continued

Motor Reset

Complete motor reset back to factory settings

Press and hold the ▲ ▼ buttons together and watch the blind for two movements
KEEP HOLDING BOTH BUTTONS

Immediately release the ▼ button but
KEEP HOLDING THE BUTTON ▲

Press and release the ▼ button 5 times but
KEEP HOLDING THE BUTTON ▲

KEEP holding the ▲ button until the blind shunts
Now release the ▲ button

Motor Reset

NOTE:
Now that no limits are set, the blind will jolt twice before moving when pressing and holding one of the command buttons
