ZIPPED-EDGE TWIN ROOFLIGHT SYSTEM

For large rooflights, atria and orangeries, KuroLok Twin RL offers a unique solution.

OVERVIEW

- Meet-in-the-middle tensioned rooflight system
- Zipped-edge fabric retention
- 5 year warranty
- Sizes up to 3m wide, 6m drop, 18m²
- Includes headboxes and slim side channels

SYSTEM DETAILS

KuroLok Twin RL system harnesses a pair of KuroLok RL blinds running in the same side channels, drawing from opposite ends to meet in the centre of large openings.

The Twin system has two headboxes at each end of the blind. The blind fabric is locked into the side channels using zip technology and tensioned via powerful constant-tension spring (CTS) units. Sturdy steel legs connect the headbox and side channels to create a rigid frame.

Universal profiles allow the frame to be fixed through the top, face or sides as required and all fixings are completely concealed.

USES & APPLICATIONS

KuroLok Twin RL blinds can span up to 6m with a cost-effective system that has the same neat appearance and ease of installation as the standard KuroLok RL.

Motorised operation makes controlling your KuroLok Twin RL blinds easy from anywhere. The ability to operate the two halves separately offers maximum versatility for controlling light penetration.
