TRANSFORMING HOW YOU FILL CRITICAL IT ROLES

Discover the most effective and empowering talent acquisition solution for cloud, cybersecurity, and AI openings

Meet Divergence Academy – the innovative talent acquisition solution specializing in:

Artificial Intelligence

We're on a mission to equip motivated talent with deep knowledge and skills in tech, cloud, cybersecurity, and AI—launching careers with employers seeking certified digital expertise and a mindset to meet market demands.

Divergence Academy is rapidly establishing its reputation as both the best vocational trade school for emerging technologies and as a trusted source of talent. We are fully prepared to meet and exceed the demands of cloud engineering and cybersecurity in an increasingly competitive marketplace.

When you partner with Divergence Academy, you join an elite group of top global leaders such as IBM, Citibank, and AT&T.

Skip the search. We bring the right talent to you.

Divergence Academy transforms the way you fill critical IT roles. We present you with veterans successfully transitioning from a military background by acquiring elite technology cloud and AI skills. These individuals demonstrate passion and motivation to immediately impact your bottom line. How do we know our candidates are best suited to your company? That's simple. We trained them.

"The uniqueness of Divergence
Academy's blend of talent placement and advisory services is like a breath of fresh air. It's their combination of education and strategy that's going to make the market for cloud engineering so much better."

John M.

Director, Brinker International

DIVERGENCE ACADEMY

Why top employers choose Divergence Academy

5 ways we simplify talent acquisition

1. First access to in-demand talent

Through our Academy, we build and develop our own talent pool. Unlike other placement groups, the only candidates we represent are military veterans who successfully completed our rigorous cloud engineering and cybersecurity curriculum. This robust roster of newly-certified professionals is exclusively available to our partner employers—by working with us you have the initial opportunity to interview and onboard top talent when their knowledge is fresh and their skills sharp.

2. Fill critical IT roles faster

We take the time to understand your company culture and IT staffing needs. We maintain long-term personal and educational relationships with each of our graduates, and as such, we can efficiently identify and match candidate skills to needed skills. By tailoring our approach to meet the needs of your company and our talent, we greatly reduce time and effort normally required to sort through resumes and vet candidates.

3. Diversify your talent

Candidates with military backgrounds thrive in data science and information technology fields. At Divergence Academy we don't just educate—we listen, collaborate, and share experiences with our military veterans to ease the transition to the civilian workforce. Our unique combination of immersive learning, foundational skill-building, hands-on experiences, and ongoing support prepares graduates who have led in the military to lead and succeed in your company.

4. Lower recruiting costs

When you work with us, you can strike "recruiting fees" from your operating budget. Unlike other firms, agencies, or portals, there's no charge to you or our candidates for our talent placement services. Divergence Academy is compensated through the GI Bill® benefits of our military students.

5. Deliver immediate impact

Every candidate we present is prepared, certified, and ready to make an immediate impact in your business. Our first-class instructors are globally recognized IT practitioners with real world experience at top companies. Their mission is to empower your future employees with the cutting-edge skills, confidence, and performance-driven mindset to do the job—and do it well—on day one.

Share our passion. Choose how to collaborate.

We have a consultative approach to working with business partners. We share the passion to help qualified veterans transition to sustainable careers with employers who value their unique contributions.

We make it our mission to develop an in-depth understanding of your company, culture, and specific cloud engineering and IT talent needs.

One of our dedicated placement experts will work directly with you to fill specific positions, or we can present you with best-match candidates from each of our graduating classes.

We can also deploy a private portal where you can review Divergence Academy candidates on your schedule.
