AutoDrop Starter User Guide

Section 1: Welcome

Welcome to AutoDrop Starter. This system is built for creators, solopreneurs, and DIY marketers who want to plan, organize, and execute content drops without clutter or confusion. Whether you are publishing your first post or mapping a consistent drop schedule, this guide will walk you through everything you need to get started.

Section 2: What is Inside

Your AutoDrop Starter Dashboard includes three key sections, each with tools and resources ready to go.

Docs: Access all guides and walkthroughs, including this Starter Guide, advanced references, and optional learning resources.

Templates: Three fully editable spreadsheets: Content Calendar, Prompt Builder, and Campaign Planner.

Assets: Visual references to help you understand how content flows through the AutoDrop system, including the Starter Flow Diagram and Starter Automation Map.

Section 3: Quick Start Walkthrough

Follow these steps to get your dashboard running smoothly:

1. Duplicate your dashboard using the link provided after purchase.
2. Explore the Docs tile to find this Starter Guide and other resources.
3. Review the Templates tile to familiarize yourself with the spreadsheets.
4. Confirm that every tile and embedded file opens correctly.

Section 4: Using the Templates

Each template includes a detailed walkthrough embedded in your dashboard. Here is what each one does:

Content Calendar: Plan your posting schedule across platforms, track deadlines, and manage your creative queue.

Prompt Builder: Create and organize custom AI prompts for captions, creative ideas, or marketing copy.

Campaign Planner: Map out multi-post campaigns, set clear goals, and track milestones from ideation to launch.

Section 5: Your First Drop

Use this framework for planning and executing your first content drop:

1. Brainstorm content ideas.
2. Plan your schedule using the Content Calendar template.
3. Build and store prompts in the Prompt Builder.
4. Track progress and adjust your strategy using the Campaign Planner.

Section 6: Best Practices

• Keep your dashboard organized by keeping titles and file paths clear.

• Download all included files to your local drive as a backup.

• Use the Assets section to visualize your workflow at each stage.

• When you are ready to scale, revisit the advanced references in the Docs section to explore Pro-tier or Sovereign-tier features.
